

Company Profile

Contemporary Bureau for Consultation

Contemporary Bureau For Consultation

is a multi disciplinary consultancy office.

Provides remarkable and professional consultation services in the field of Architecture, Urban, Landscape, Interior, Structure, Civil and MEP design.

From the early stage of project strategic planning and programming, to the very detailed stage of design documentation and supervision.

Our main goal is to satisfy human needs with respect to mother nature and global community, by providing sustainable designs.

“ Increase human comfort and reduce environmental impact ”

1.0 About CBC

1.1 Who We Are

Following the trend of modern globalization and reflecting the great idea of professional join venture between qualified parties on the same profession. CBC was founded as a result of join venture between two remarkable design offices in Egypt, to create more powerful and professional identity.

CBC finally formed to be a group of highly skilled Management and Design Consultancy professionals. The group offers complete design, supervision, execution, and management services including Planning, Programming, Architecture, Interior Design, Graphics and Landscape Architecture. Our scope of work covers Construction with associated qualified contracting companies.

Our multi-disciplinary teams combine function and aesthetics into facilities that enhance the lives of all who use and operate them. CBC Design Management spans the full spectrum of Design Profession.

The group headquarter is in Cairo. The founders of CBC have very wide experience for projects in Middle East and Gulf area.

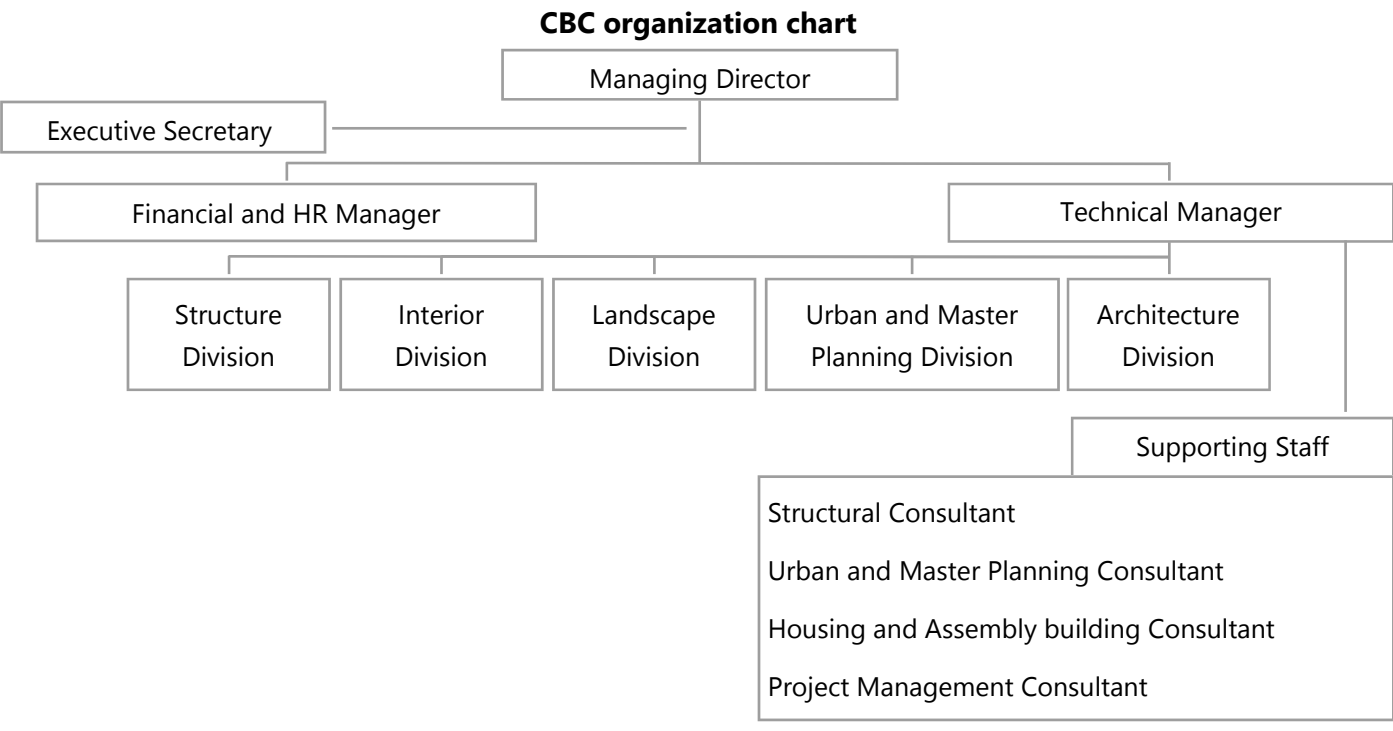

The concept under which CBC operates is by pulling the required resources (of specialist consultants) from local and regional offices. The prime objective being to benefit the client in terms of proving highest professional services and sharing our experiences with other offices. This will facilitate exchange of professional know-how and upgrade the standards of services.

We have been applying this system successfully for many years.

Parties of join venture

Company name	Owner	Year of foundation
EEE	Arch.Eman Ellewah	1995
Axis Architecture	Arch.Essam Shokair	1999

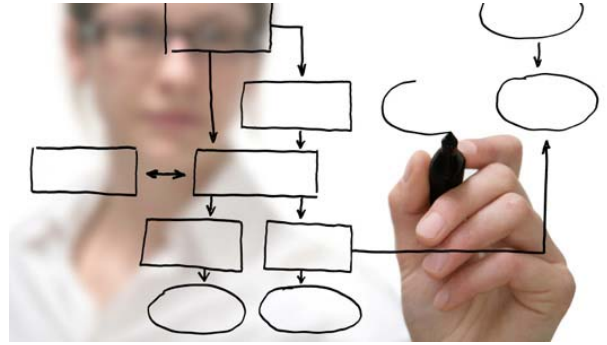

CBC Company profile includes the previous technical pre-qualification for all parties.

1.2 Basic Principles & Work Methodology at CBC

CBC..... Speaks through Pictures:

Design is the reflection of mind on paper. A brief glance through CBC Brochure will confide confidence in you of CBC's professional quality.

CBC..... Towards Client:

CBC honestly believes in direct communication and participation of client at regular intervals during the entire project management and design process. We call it in-house-on board review sessions. Client's views, opinions, assessment, preferences and recommendations are duly respected and incorporated.

In principle, at CBC, we aim to provide best of professional services to our client by working within the rich Local and International culture, traditions and values. Our goal is to provide most cost effective design without sacrificing quality.

CBC..... Towards a Pan-Gulf Consortium:

The Founders of CBC have very wide experience for projects management throughout Middle East. One of our objectives is to help professionals and local firms by providing wider knowledge base for project management, design, technical and management aspects of projects.

CBC..... A Middle East Head Quarter:

CBC is a consultant firm with a headquarter in Cairo. The focal area of operation is Egypt, the Gulf region and the Middle East.

CBC- Egypt operates with a core team with expertise in **Project Programming, Master Planning, Architecture Design, Interior Design, Supervision, and Contract Management.**

CBC-Cairo A Bridge to the West:

To our liaison offices throughout Middle East, CBC -Cairo offers.....

- **Project program support**
- **Conceptual Design Support**
- **Project Management Support**
- **Technical Know-how**

Everyone benefits from spread of knowledge.

CBC..... Professionalism:

Our techniques are simple but effective. All projects go through the following:

Brainstorming session is arranged in the very beginning of a project.

One or more team members explore various alternatives.

Design evaluation criteria are evolved based on client requirement and design philosophy.

Alternatives are narrowed down to three for further details.

The core team and the client grade three designs.

The best option gets better before reaching to our valued Client.

Quality control is maintained throughout detail design.

Summary.... CLIENT SATISFACTION IS OUR PRIME OBJECTIVE.

1.3 Strategic Planning For Projects

CBC strategy in approaching the projects is to establish dedicated, specialized and independent production team for each project. However, the Architectural Design Works must remain with CBC Core Team for Design Quality Assurance. In our years of experience of major projects design and execution, we have developed an excellent system of communication between Client and the Core Design Team, which we refer to as On-Board-Review-Sessions. In short it means Client's participation throughout the entire design process wherein Client's views and opinions are duly respected and incorporated.

There will be a design team operating under the leadership of the Head Designer Each team generally has a Senior Project Designer and a Project Manager/Coordinator. The Senior Project Designer will handle the team for all design related works whereas the Project Manager/Coordinator will assure quality control and coordination with all engineering services required for the project. This approach will assure the Client Project Team that the project is carried out in professional and timely manner. The Client Engineers will be involved in the entire design process.
